Senior Linux-technicians

We are currently seeking a senior Linux technicians who will work with the management and development of our Linux environment. In addition to deep knowledge in Linux, it is also a requirement that you have a basic knowledge of networking. Our primary server operating system is Debian Linux.

We work according to the principles of "lean" and "agile", and we are therefore looking for someone who is outgoing and tempted to be involved in influencing the development of a fast growing company. The culture of us is characterized by momentum and pleasant working environment.

Who you are?
We are looking for
- have 3-5 years of work experience in similar work
- have worked with critical Linux environments.
- good knowledge of scripting in Linux
- advantage if you have experience in static and dynamic routing in Linux environment
- advantage if you have experience of switching i Juniper and HP.
- advantage if you can PERL or any other language.
- excellent technical documentation skills

Who we are?
Internet Vikings are a company that is in the absolute cutting edge when it comes to wholesale traffic market, with a focus on companies in the SEO, affiliate and domain industry.

The Company operates in an international market, with main point on Europe and the United States. The company is in a very expansive phase of growth during both 2014 and 2015.

What we offer?
We believe in the principle that the more fun you have at work, the better you perform. It is also the single biggest reason for our success. We are in very fresh and open space at Hötorgets subway station. We go on trips and have fun together. Of course, we also offer market salary.
